

Driver Safety

Parking on slopes:

When parking on any slope:

- Set the parking brake.
- Put vehicle in park or gear.
- Set chocks.

When parking on an uphill slope with a curb:

- Turn front wheels away from the curb, so that the curb will stop the vehicle if it starts to roll.

When parking on a downhill slope with a curb:

- Turn front wheels toward the curb, so that the curb will stop the vehicle if it starts to roll.

When parking on any slope without a curb:

- Turn the wheels so the vehicle will roll away from the center of the road if the brakes fail.
