

Driver Safety

Stopping on the shoulder:

- Pull off onto a suitable surface out of the line of traffic.
- Do not stop or park in the travel lane, but if there is no choice, leave as much of the roadway clear as possible for other traffic.
- Immediately turn on flashers, put on a safety vest, and place emergency warning devices.
- Call for help if you can't fix the problem yourself.
- If your vehicle is safely out of traffic, wait inside with the doors locked until help arrives.
- If you leave the vehicle to seek assistance, place a note on the steering wheel that lets others know where you went.
